

Iterators

Iterator is a set, iterator()  
loop methods  
while (i.hasNext())  
do stuff  
access with i.next  
,

java.lang  
java.util  
java.io

loop while (i.hasNext())

for (i in set) { }

String builder = new String builder (String)

... char at (0)

... i.append

set.add

set.size

Scanner = new Scanner (System.in or file)

while (scan.hasNext())

scan.next

}

String - index of

hash map i = new HashMap

i.get(key) returns value

i.containsKey(key)

putAll (set key set())

e loops over all keys

Exception / FileNotFoundException

override

write string out message (message)
